DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a carbon nanotube composite material.

Group II, claim(s) 9-17, drawn to a method of forming a carbon nanotube composite material.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is anticipated by Watanabe et al. (US 20050127030) and does not make a contribution over the prior art as set forth below.

3. During a telephone conversation with Richard Hinson on 5/6/09 a provisional election was made with traverse to prosecute the invention of I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-17 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1782

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-8 rejected under 35 U.S.C. 102(e) as being anticipated by Watanabe et al. (US 20050127030).

Watanabe discloses a carbon nanotube polymer composite material comprising a polymeric solid state continuous phase comprising one or more polymer chains, one or more carbon nanotubes dispersed in the continuous phase, and a bonding agent for mechanically dispersed in the continuous phase, and to the one or more carbon nanotubes, the bonding agent joined to the polymer chain and non-covalently bonded to the carbon nanotube (paragraphs [0015] – [0017], [0070] – [0072], [0076] – [0077], [0095]).
